INTRODUCTION

The Bulletin of Statistics is prepared by the Statistics Division of the Office of Planning and Statistics. It includes all new and revised data available by the middle of the month of issue.

All series will be updated and revised as and when new information becomes available. In some cases, figures are rounded to the nearest digit where necessary, and hence the sum of the constituent items does not always agree with the total shown against them. A number of tables published previously have been replaced in this issue by tabulations on subjects not included earlier. The Table of Contents indicates in which issues, and pages, certain information has been included.

The classification used for the import-tabulations (Tables 23. b. and 23. c.) is published by this Office under the title 'Overseas Trade Classification 1977/8'. This, and other publications listed on the back of the Bulletin can be ordered from this Office.

Publication of this Bulletin is in accordance with the provisions of Public Law 7-37 and was made possible through the assistance provided by the United Nations' Department of Technical Cooperation and Development to the Statistics Division of the Office of Planning and Statistics.
