LETTER FROM THE GOVERNOR

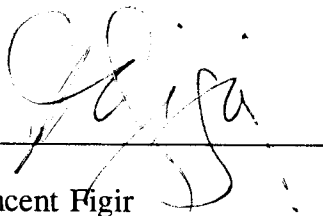

Citizens of Yap State:

This publication is the sixth Statistical Bulletin published by the statistics section of the Office of Planning and Budget. The primary emphasis of this publication is on the lucid presentation of economic and social statistics essential for development planning and policy decision making.

It is our intention to provide in a readily accessible form, important statistical information on the economic and social aspects of Yap State's economy. However, this effort is limited by the inadequacy and inavailability of recorded data and limited manpower in the data gathering process. Wherever coverage is known to be incomplete, it is indicated by the words "not available" or "NA".

This publication represents the effort of Francis Yoror and Leo Chiengyen. Both have exerted exceptional professional dedication in their efforts and have been able to provide for a significant statistical base. Special thanks to Michael J. Levin, of the U.S. Bureau of the Census' Population Division, who helped us reprocess the 1987 Census data, and who is helping us reformat the yearbook. Notes of appreciate are also extended to those in the public and private sectors who have made contributions to this publication. Without their support, this publication would not have been possible.

Finally, comments and criticisms about this publication are welcome so that subsequent statistical publications can be improved.

---

Vincent Figir  
Governor, Yap State

### GENERAL DESCRIPTION

Yap State stretches from about 6 to 10 degrees North latitude and 137 to 148 degrees West longitude and encompasses approximately 500,00 square miles of area. The State consists of about 78 islands of which only 22 are inhabited. Most of the islands are of volcanic origin and some are of raised limestone.

NOTES TO THE TABLES	
Symbols	Description
0	Indicates zero
N/A	Not available
(000s)	Thousands of the given unit
(\$000s)	Thousands of US dollars
(\$)	US dollars
Ave.	Average
Fy.	Fiscal year (Oct 1 - Sept 30 of the following)
Cy	Calendar year
Kwh	Kilowatt hour
%	Percent
-	Value is less than the given unit

## SECTION 1: METEOROLOGY

Yap State is affected by intermittent trade winds and monsoons. The wettest months are from June to October when rains come almost daily from the west to Southwest. Average rainfall during the rainy season is 14 inches and 5.6 inches during the dry season. The temperature is moderately high, spanning the 80 degree fahrenheit range, with consistantly high humidity. The average number of hours of sunshine per year has varied between 133 (in 1993) and 192 (in 1994) over the previous 5 years.

## SECTION 2: AGRICULTURE AND FISHERIES

The amount of copra produced over a year varied between 1989 and 1993. In 1989 and 1993 460 tons and 313 tons were produced respectively.

The volume recorded here is based on fish production from the Yap Fishing Authority except for 1993 and 1994. In 1993 and 1994 fish caught by Ting Hong, NFC and YFC were also included. The volume of fish caught increased from 53.4 tons in 1989 to 1,595.6 tons in 1994.

Table 2.0. Copra Production and Value: 1989 to 1990		
Characteristic	1989	1990
Production (R/T)	460	313
Price/Ton (\$)	260	212
Value (\$000)	119	65

Source: Yap Cooperative Association, Waab Transportation Company  
 Note: Tonnage in Revenue ton which is the greater of 40 cu. ft. or 2200 lbs

Table 2.1. Volume and Value of Fish Caught by Yap Fishing Authority: 1989 to 1994						
Item	1989	1990	1991	1992	1993	1994
Catch (Tons)	53.4	73.4	71.9	70.3	1,252.3	1,595.6
Value (\$000)	83	113	113	113	22,613	13,833

Source: Yap Fishing Authority

Note: These figures only show the total volume of fish caught by some local fishermen and Yap Fishing Authority. Reef and pelagic fish have been combined to obtain the total catch for each year. It should be noted that these figures may not reflect the actual catch for each year as only Yap Fishing Authority keeps records of these catches. Both subsistence and commercial fishermen often sell parts of their catch directly to the public.

### SECTION 3: EMPLOYMENT AND EARNINGS

Of the population over 18 living in Yap state, 71 percent are economically active. Forty-one of the economically active have paid employment while the remainder were engaged in subsistence activities. A larger portion of the Outer Islanders were economically active than the Yapese, 78 percent versus 67 percent respectively. A majority of this difference is due to the increased amount of subsistence activity in the Outer Islands. Equal portions of females and males are economically active in Yap--about 70 percent. Seventy-eight percent of the females are occupied in subsistence activities compared with 38 percent of the males.

Of those persons over 15 who are not economically active the largest portion are attending school and the second largest portion are engaged in unpaid housework. When broken down by sex the largest portion of not economically active male adults are attending school. The largest portion of not economically active female adults are engaged in unpaid housework.

Twenty-eight percent of those persons over 15 in 1987 were employed by the government, of which 76 percent were males and 80 percent were from Yap Proper.

Table 3.2 provides the number of public employees (Micronesian and Foreign) by salary level for 1987 to 1992, excluding 1991. Seventy-five percent of the public employees fall in the salary range of 2,000 to 7,000 dollars.

Table 3.0. Population Aged 15 Years and Over by Economic Activity, Sex, and Place: 1987

Economic Activity	Total			Males			Females		
	Total	Yap Proper	Outer Islands	Total	Yap Proper	Outer Islands	Total	Yap Proper	Outer Islands
Total	5,831	3,883	1,948	2,945	2,051	894	2,886	1,832	1,054

#### SECTION 4: INTERNAL AND EXTERNAL TRADE AND TOURISM

Tourism is a growing industry for Yap. The numbers of tourist visiting Yap more than doubled between 1988 and 1992. Table 4.0 also contains numbers of visitors arriving on Yap for business, employment, military services, religious work, or as crew members for a ship.

The value of exports vary from year to year. An overall increase occurred between 1989 and 1993 despite some years of decreased exports. The major exports were consistently copra, fish and betelnut.

The total dollar value of imports more than doubled between 1989 and 1993. The three largest import commodities were food, beverages and tobacco, and manufactured goods. The most significant increase has been the import of food: in 1989 2.3 million dollars of food was imported by 1993 food imports increased to 4.8 million dollars.

Notes: Imports include only taxable goods purchased for commercial use; Petroleum products are not included in this table, since they are imported under a separate tariff structure. The imports are values at Free-On-Board (FOB) prices. Government and Non-Commercial imports are omitted from the table; SITC = Standard International Trade Classification

SECTION 5: BUSINESS AND FINANCE

No tables this year.

## SECTION 6: TRANSPORTATION AND COMMUNICATION

Motor vehicle registration shows an upward trend from 1987 to 1990 and then a downward trend from 1990 and 1992. Motor vehicles registration from 1990 and 1992 decreased by 23 percent. In 1992 the largest portion of motor vehicle registered are Pick-ups (50 percent). The second largest portion of motor vehicle registered are Sedans (31 percent). Trucks, Buses, Jeeps, Station Wagons and Motorcycles make up the remaining 19 percent of the total motor vehicles registered in 1992.

The overall passengers of the MV Micro-Spirit varied from year to year. Table 6.1 shows that the number of passengers decreased from 1988 to 1991 and then from 1991 to 1992 it increased again by 34 percent. Likewise, cabin passengers varied from year to year with the highest in 1989. Deck passengers also shows variations from year to year. From 1991 to 1992 deck passengers increased by 25 percent.

The number of commercial ships arriving in Yap from 1990 to 1994 ranges from 10 to 18. Table 6.2 shows that the largest number of ships arriving in Yap was in 1994.

**SECTION 7: GOVERNMENT FINANCE**

Expended government appropriations in fiscal year 1992 were less than budgeted government appropriations. Seventy-two percent of the expended appropriations were from Compact funds and 24 percent were from Yap State Legislature. The remaining funds were from foreign aids, special funding, and FSM funding. The largest portion went to public utilities and contracts, the second largest portion went to education, and the third largest portion went to health services. Revenue collection by Yap State over the years 1987 to 1992 (excluding 1991) increased steadily from 1.3 million dollars to 3.1 million dollars.

## SECTION 8: ENERGY

There are three power plants in the State of Yap. The main one is located on the main island (Yap Proper). The second largest is in Ulithi and the third in Woleai.

Table 8.0 only reflect power production for the main plant located on Yap Proper. Power production somewhat remain steady between 1990 and 1994 with the highest power production in 1994.

Table 8.0. Power Production: 1990 to 1994					
Production	1990	1991	1992	1993	1994
Production (Kwh)	13,180,874	13,347,238	14,318,832	13,977,810	14,338,827
Change from previous year	1,258,954	166,364	971,594	(341,022)	361,017
Percentage change	10.6	1.3	7.3	-2.4	2.6
Source: Public Utilities and Contracts, Yap State					

## SECTION 9: POPULATION

The average population density for Yap State is 244 people per square mile. This statistic is quite different for Yap proper versus the Outer Islands. Yap Proper has a population density of 179.5 people per square mile while the Outer Islands have a population density of 590.1. This dissimilarity is largely due to the variation in dry land area. Yap Proper is 38.6 square miles of land while the Outer Islands consist of 7.2 square miles of dry land area. Thirty-eight percent of the population lives in the Outer Islands and 62 percent lives on Yap proper during the 1994 Census.

Table 9.1 shows the historical growth of the municipalities/islands of Yap State. The population of the Outer Islands grew by 22 percent between 1987 and 1994 while the population of Yap Proper only grew by 4 percent. This difference is due to higher fertility in the Outer Islands as well as higher out migration from Yap Proper.

The projections made in Table 9.2 were based on the 1987 Census. The projection seems to be an overestimate because the 1994 population is 394 people less than the projection. The projection indicates a 20 percent increase in working ages (15 to 64) as well as an 8 percent increase in children under age 15 by the year 2000.

The civil registration in Yap is not complete as can be seen by the lower number of births recorded over a year as well as the uneven sex ratio at birth. The average male to female sex ratio at birth between 1988 and 1992 was 96 males to 100 females. This is an unusual finding given that the average male to female ratio for most countries is between 104 to 107 (Shryock and Siegel, 1976). Historically Yap's male to Female birth ratio was closer to 110 making 96 a very odd ratio.

Because the population of Yap State is quite small the mortality rates and births rates vary from year to year. For example in 1991 the infant mortality rate was 18.7 and the following year, 1992, the rate was 39.2. The total number of infant deaths during these two years 5 and 10 respectively.

The crude rate of natural increase is the difference of the crude birth rate and the crude death rate and thus subject to the same fluctuations. Natural increase spanned the range from 14 per 1,000 to 22 per 1,000 between 1988 and 1992.

Table 9.0. Geographical Features, Population and Density: 1994

Characteristic	Total	Yap Proper	Outer Islands
Number of islets	78	12	66
Area in Square Miles	451.0	48.7	402.3
Dryland	45.8	38.6	7.2
Lagoon	405.2	10.1	395.1
Population	11,178	6,929	4,249
Persons per Square Mile	244.0	179.5	590.1

Source: Office of Planning and Budget, Yap State

Notes: 1994 population is provisional from census; soil is mostly chlotie, talcshist, amphilobolite, conglomerate, and volcanic bracca.

## SECTION 10: EDUCATION

High School Graduates in Yap between 1990 and 1994 peaked at 134 in 1992. Both the Outer Islands High School and Yap Proper High School had their largest classes in 1992.

In Yap Proper, there were more males enrolled in school than females between 1990 and 1994. However, of those graduating there were more females than males each year. The teacher student ratio for Yap Proper in 1994 was 15 students per teacher.

The Outer Islands have more males enrolled in school than females as well as more males graduating. The teacher student ratio for the Outer Islands in 1994 was 10 student per teacher.

Major fields of study for post-secondary education are business, computer and office management, law and related fields, and medicine.

Note: Field of study refers to subject stated in scholarships and grants application.

**SECTION 11: HEALTH**

Infants born under 2,500 grams (United Nations Limit for Underweight Babies) are common among Yap proper women than Outer Islands women.

There appears to be no seasonality to births in Yap State. The births are distributed evenly across the months of a year.

Hospital records suggest that most visits to the hospital are due to respiratory system conditions, skin and tissue irritations, and digestive system conditions.
