Notes:

1. Projections refer to June 30 of the respective years.
2. The population projections and the assumptions for the period 1989 - 2013 are the same as those shown in table 2.3.
3. The values for life expectancy at birth are derived from the starting values of 59.6 years for males and 62.6 for females in 1988, using the UN Model for Mortality Improvement, Manual X.
4. Computer software package "PEOPLE" is used in the projections.

- Notes: 1. The Expectation of Life at Birth is defined as the average number of years a person can expect to live at birth based on known mortality conditions.
2. The mid-period values for life expectancy at birth are based on estimates derived from the starting values of 59.6 years for males, and 62.6 years for females in 1988, using the UN Model for Mortality Improvement, Manual X.
3. The rate of natural increase is the difference between the crude birth rate and the crude death rate.

* Excluding United States Army Kwajalein Atoll (USAKA). The projections are mainly for Ebeye.

- Notes: 1. The population projections for Marshall Islands are the same as those shown in Table 2.3.
 2. The population figures for Majuro and Kwajalein are projected using the ratios derived from the projections that are based on the compound growth rates.

An Age Specific Fertility Rate(ASFR) is calculated as the number of births in a year to mothers of a specific age group (or per 1000 women) of the same age at midyear.

The Total Fertility Rate(TFR) is a summary measure independent of the age and sex composition of a population. It represents the average number of children a group of women would have by the end of their reproductive life.

Note: Import values are on f.o.b. basis up to 1988.

Imports exclude government imports and tax exempted goods for the years 1979 to 1988.

*Ebeye recorded imports were adjusted upwards by 7.0 percent to include postal imports since records on such imports were incomplete. The 7.0 percent co-efficient is the ratio of postal imports to total imports in Ebeye for Calendar Year 1994.

**Ebeye import figures for 1996 were not available from customs authorities. Therefore, Ebeye imports were estimated as a proportion (20.36%) of Majuro imports. This proportion is the average ratio of Ebeye imports to Majuro total imports for the period 1993-1995.
